YUMAIN TEAM SKILLS

TARGET MARKETS

TRANSPORT

Predictive maintenance related to the safety of railway networks

Counting (bus eand tramway)

INDUSTRY 4.0

Protection of goods and people : * Peripheral machine protection * Risk of collision detection Machine / pedestric

Surface inspection and quality control

YUMAIN TECHNOLOGY CONCEPT

- Simple Tasks with Human Brain vs Von Neuman Computer (like PC):
 - Calculate in less than one second (398387.86 x 498.07=?)

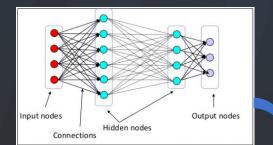

But recognize in less than one second this image:

Artificial vision model proposal : Deep Learning + Spike Neurons
Arithmetic calculations used in image filtering for example:
Yon Neuman (or Harvard) architectures

Object recognition from natural images:
Neuro-inspired Human intelligence

Deep Neural Network (DNN) + Spike Neural Network (SNN) implemented on Embedded Systems

Algorithm To Architecture Adequacy Methodology

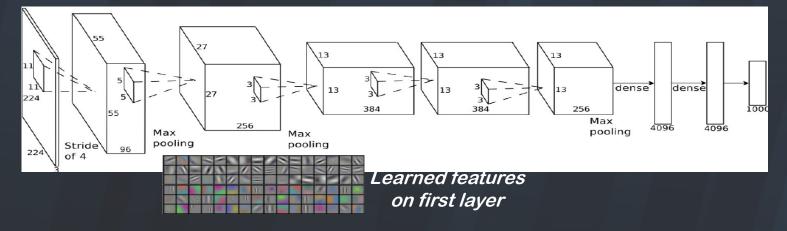

Deep Neural Network (DNN)

6

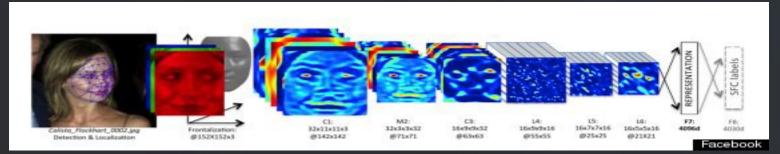

- ImageNet classification (Hinton's team, hired by Google)
 - 1.2 million high res images, 1,000 different classes
 - Top-5 17% error rate (huge improvement)

YUMAN

- Facebook's 'DeepFace' Program (labs head: Y. LeCun)
 - 4 million images, 4,000 identities
 - 97.25% accuracy, vs. 97.53% human performance

DNN: STATE-OF-THE-ART IN RECOGNITION

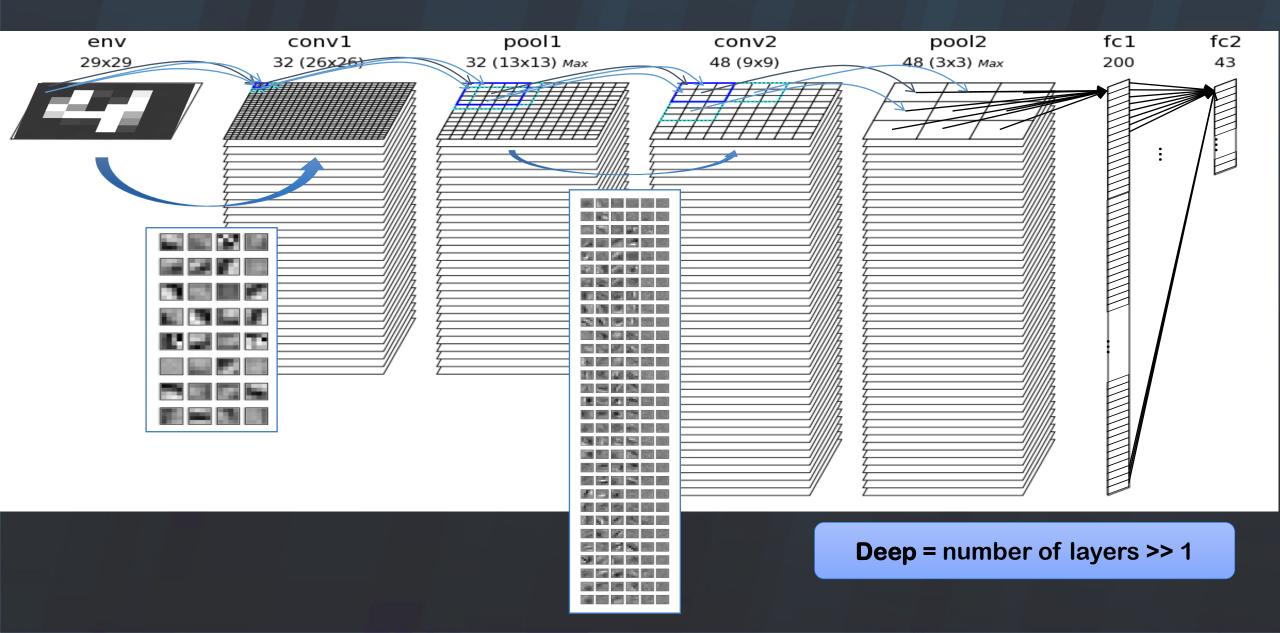

Database		# Images	# Classes	Best score
MNIST75Handwritten digits55	906	60,000 + 10,000	10	99.79% [3]
GTSRB Traffic sign		~ 50,000		99.46% [4]
CIFAR-10 airplane, automobile, bird, cat, deer, dog, frog, horse, ship, truck		50,000 + 10,000		91.2% [5]
Caltech-101		~ 50,000	101	86.5% [6]
ImageNet	GENET	~ 1,000,000	1,000	Top-5 83% [1]
DeepFace		~ 4,000,000	4,000	97.25% [2]

YUM

• State-of-the-art are Deep Neural Networks *every time*

Deep Learning based on ConvNets (CNNs)

EDGE COMPUTING SENSOR EMBEDDED SMART SENSOR

ECS is a solution that can be installed in hazardous areas, consisting of fixed sensors with embedded artificial intelligence (Edge-Computing). These smart sensors detect and analyse risk situations in real time. The combination of image processing and artificial intelligence can drastically reduce detection failures and false positives.

Applications covered by YUMAIN SIL 2 certification

Certificate of compliance In accordance with IEC 61508

N° 175362 / 2022A

The National Institute for Industrial Environment & Risks (INERIS - Institut National de l'Environnement Industriel et des Risques), a public organization, established by decree No.90-1089 of 7 December 1990, and accredited by COFRAC under number 5-0045 for certification of products and services (scope of accreditation available on the website www.cofrac.fr) issues a certificate of compliance related to IEC 61508 standards for the following product:

Denomination:	E.C.S. Safety
Туре:	Sensor with an AI algorithm embedded
Manufacturer:	Yumain
Applicant	
of the certificate:	Yumain
	Dijon, France
Description:	The product is an industrial smart vision sensor that detects pedestrian and/or industrial vehicles in a defined area with the use of an AI algorithm in order to secure hazardous areas.

Certification procedures are available under www.ineris.fr

IM-1729AD - 20/01/2017 Only the entire document may be reprinted.

1/1

Detection of people and devices in a dangerous area

Detection of persons in a hazardous area

APPLICATION YUMAIN - COLLISION -

PREVENTION OF COLLISIONS BETWEEN PEDESTRIANS AND FORKLIFTS IN REAL TIME

The main reasons that motivate company managers to install this type of solution:

Ensure the protection of human beings in the company's environment

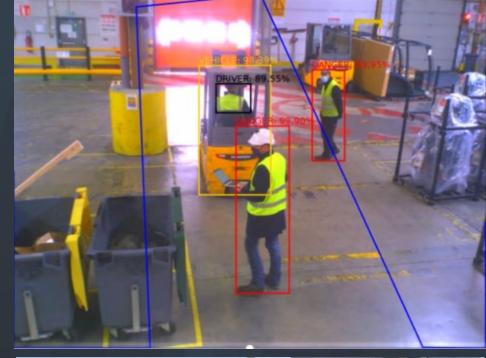

Securing the site and interacting in hazardous areas

Improve employee behavior through risk awareness

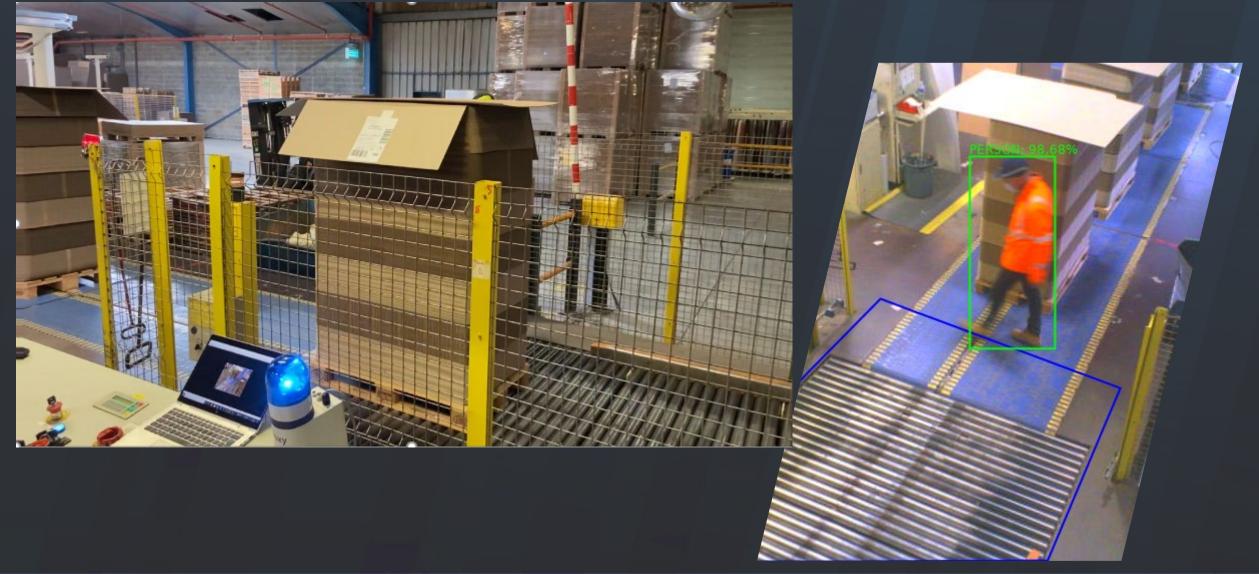

APPLICATION YUMAIN - Peripheral Machine Protection -

APPLICATION YUMAIN - Peripheral Machine Protection -

Thank you
