6th European **Conference on standardization, testing and certification** in the field of occupational safety and health

---

# Meaning of certification: from the old to the global approach

Design & manufacturing

Free movement/  
single market

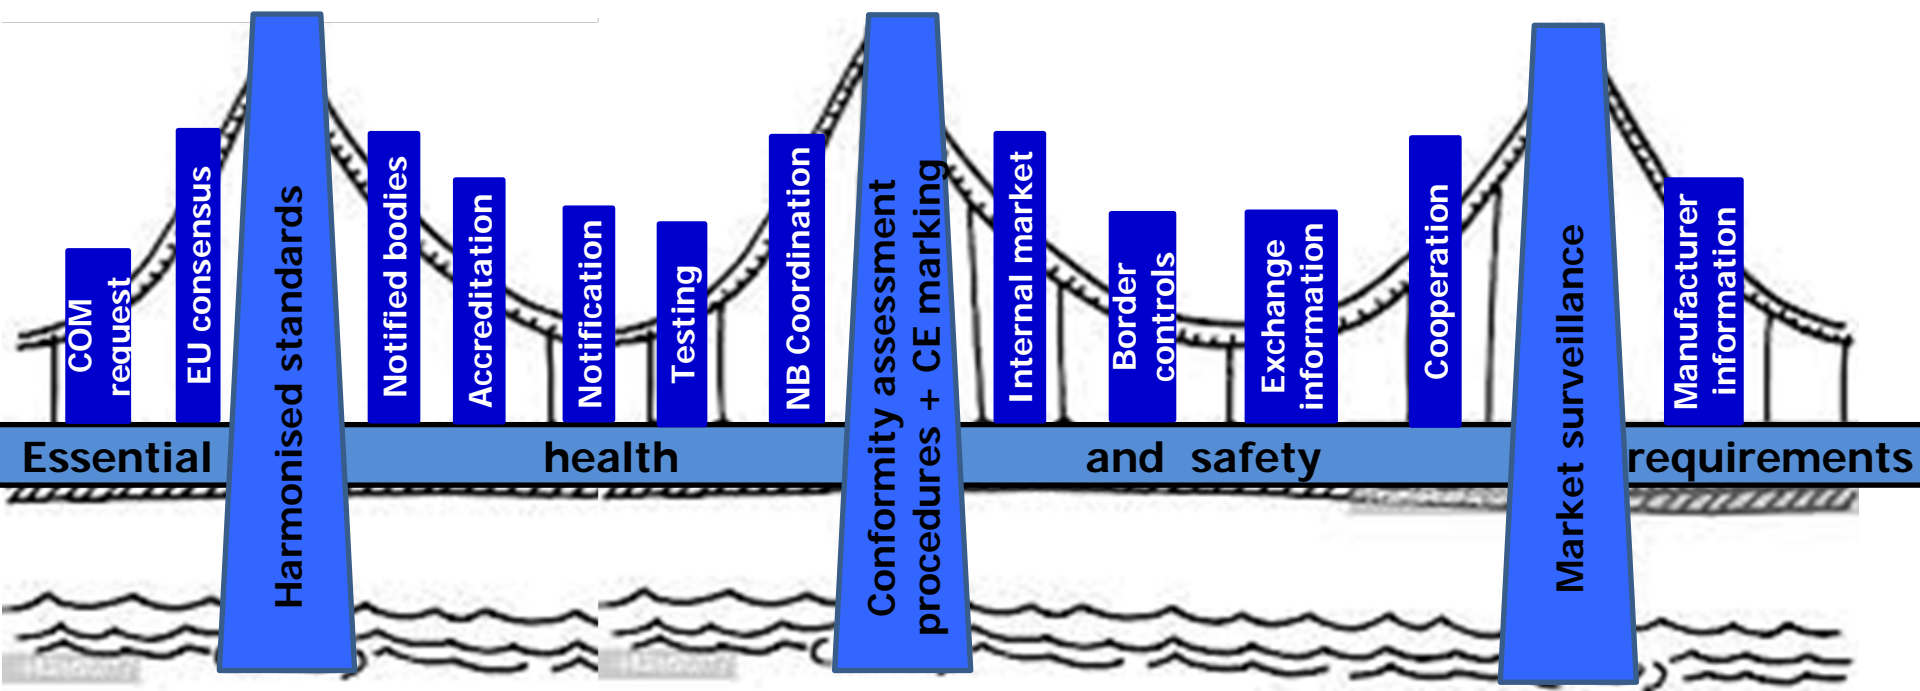

Ensure protection of  
the health and safety  
of users

# Evaluation of conformity: the bridge to user's safety

Safe product

Safe use

Risk assessment:

Risk assessment:

- intended use
- reasonable foreseeable uses

- selection
- use & maintenance

**Customized approach: can we ensure protection of the health and safety of workers?**

**Do we need new rules for keeping pace with change?**
